College of Economics and Humanities under Baku State University

Description:

Founded in 1919, Baku State University (BSU) stands as the first classical-type higher education institution in Azerbaijan and remains one of the most influential academic centers in the region. For over a century, the university has played a pivotal role in shaping the country's intellectual, scientific, and cultural development, educating generations of specialists, scholars, and public figures.

The main campus, located in the Yasamal District of Baku, is one of the largest and most prestigious educational complexes in the country. It integrates a wide network of faculties, advanced laboratories, libraries, research centers, and administrative buildings within a single academic environment.

The campus also includes multiple academic buildings, among which the C building (Building C) holds an important place as part of the university's educational infrastructure. Its strategic location near the city center, combined with well-developed infrastructure and modern teaching conditions, makes BSU a central hub of academic life for both students and faculty members. In recent years, the university has undergone significant renovation and modernization, with classrooms and laboratories equipped with cutting-edge technologies that support innovative teaching methods and internationally aligned education standards.

Organizationally, BSU comprises 2 institutes and 16 faculties, offering a broad spectrum of academic programs across natural sciences, social sciences, and humanities. The university currently operates one regional branch — the Gazakh branch — which extends its educational reach beyond the capital. Its scientific infrastructure is equally extensive, including 2 Scientific Research Institutes, 9 Scientific

Research Centers, 1 Scientific Research Department, and 26 specialized research laboratories. In addition, BSU maintains a publishing house with modern printing facilities, 5 museums that preserve academic and cultural heritage, and around 80 scientific research and teaching laboratories. Supporting facilities such as an information and translation center, a sports and health complex, and a polyclinic further contribute to a comprehensive academic ecosystem. To enhance student welfare and campus life, the university also provides dormitories and a dedicated student campus.

Beyond its core structure, BSU operates several affiliated educational and practical institutions aimed at strengthening applied knowledge and fostering student development. These include the Quba Educational-Practice and Recreation Base, the Altiaghac Educational-Practice Base, the College of Economics and Humanities, and the “Young Talents” Lyceum, which is specifically designed to nurture gifted students. These institutions not only support practical training and scientific research activities but also promote the effective organization of students’ extracurricular and recreational engagement.

Overall, BSU continues to evolve as a modern, research-oriented university, combining its rich historical legacy with contemporary educational practices. Its commitment to academic excellence, innovation, and international cooperation ensures its leading position in the higher education system of Azerbaijan and its growing recognition on the global stage.
