[1] Setting and Infrastructure (SI)

[1.4] Campus Setting

Baku State University -Main campus, Baku, Azerbaijan

**BAKU
STATE
UNIVERSITY**

The campus of Baku State University is strategically located in one of the most central and aesthetically appealing areas of Baku—the Yasamal District. Positioned at 33 Zahid Khalilov Street, at the intersection of Matbuat Avenue, B. Vahabzade Street, and Mammad Rahim Street, the university benefits from a highly advantageous urban setting. This prime location ensures excellent accessibility through major transportation routes and places the campus in close proximity to the city’s academic institutions, cultural centers, libraries, and social infrastructure. As a result, BSU is deeply integrated into the intellectual and cultural life of the capital, offering students a dynamic and stimulating environment both inside and outside the classroom.

Spanning an area of approximately 8.65 hectares, the BSU campus represents a well-organized and multifunctional academic space that accommodates a diverse range of educational, scientific, administrative, and social facilities. At the core of the campus are four main academic buildings, where the majority of teaching and learning activities take place. These buildings are designed to support various disciplines and are equipped with modern lecture halls, seminar rooms, and specialized laboratories tailored to different fields of study.

Complementing the academic infrastructure is the two-story administrative building that houses the Physics Problems and Applied Mathematics Scientific Research Institutes, which play a crucial role in advancing scientific research and innovation within the university. Additionally, several one-story laboratory buildings provide dedicated spaces for experimental work, enabling students and researchers to engage in practical and applied scientific activities using contemporary equipment.

The campus also prioritizes student life and well-being through a range of recreational and social facilities. A modern sports complex and a fully equipped stadium support physical education, sports training, and extracurricular activities, contributing to a healthy and balanced student lifestyle. The Student Scientific and Technical Creativity Center, which underwent significant reconstruction in 2022, serves as a hub for innovation, creativity, and student-led projects, fostering an environment where theoretical knowledge can be transformed into practical solutions. Furthermore, a two-story cafeteria building functions not only as a dining facility but also as a social gathering space where students can interact, collaborate, and build a sense of community.

Looking toward the future, BSU continues to expand and modernize its campus infrastructure. A notable example is the ongoing construction of a seven-story administrative building for the Center of Excellence for Research, Development, and Innovation. This state-of-the-art facility is envisioned as a key component of the university’s scientific ecosystem. It will host advanced research laboratories equipped with cutting-edge technologies, providing students, researchers, and academic staff with enhanced opportunities for high-level scientific inquiry, interdisciplinary collaboration, and innovation-driven research.

Overall, the BSU campus exemplifies a harmonious blend of historical legacy and modern development. Its central location, comprehensive infrastructure, and continuous investment in innovation make it not only a place of education but also a vibrant academic community that supports intellectual growth, research excellence, and student development at the highest level.
